

VINCI ENERGIES GROUP

COMSIP is a company of the VINCI Energies Group

Introducing VINCI Energies

In a world undergoing constant change, VINCI Energies focuses on connections, performance, energy efficiency and data to fast-track the rollout of new technologies and support two major changes: the digital transformation and the energy transition.

Keeping pace with market change, VINCI Energies supports its customers by offering increasingly innovative solutions and services, from design to implementation, operation and maintenance.

With their strong regional roots and agile organisational structure, VINCI Energies' 1,600 business units boost the reliability, safety and efficiency of energy, transport and communication infrastructure, factories and buildings.

VINCI Energies: decentralised organisation - shared values

VINCI Energies applies a multi-local business model based on entrepreneurship and networking of all its expertise, working closely with its customers to create value day-to-day.

Operating in **52 countries worldwide**, our 1,600 business units intervene in **infrastructure, industry, service sector and information and communications technology (ICT)**.

They are organised around five international brands – **Omexom, Citeos, Actemium, VINCI Facilities and Axians** – in addition to a more regional identity.

Our business units share a common corporate culture and **common**
