2014 - 2019

TOTAL E&P ANGOLA - KAOMBO

Project type : Ultra-deepwater offshore

Client : TOTAL E&P Angola

Location : Singapore, Indonesia & Angola

Launched in April 2014, Kaombo is the first project on the ultra-deepwater offshore Block 32, located off the Angolan coast. Its estimated 660-million-barrel reserves span a distinct system of reservoirs at water depths reaching 1,950 meters.

The fields are connected via 300 km of subsea pipelines to two floating production, storage and offloading (FPSO) units : Kaombo Norte and Kaombo Sul.

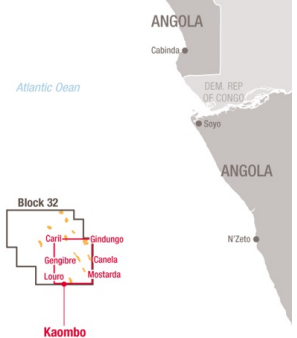

COMSIP provided 22 consultants to support the project.

Project Phases : Construction, Commissioning & Start-up.

Disciplines :

- Electrical
- ICSS -Automation
- ICAPS - Completion
- Instrumentation
- Mechanical

Positions : Superintendent, Coordinator, CSL, leader
